

## NEFA® POX

### Dyeing pastes for colouring 2-component epoxy resin coatings

**Product description:**

NEFA® POX dyeing pastes are specially matched, high concentration dyeing pastes based on A/F resin for incorporation in 2-component epoxy resin systems. NEFA® POX dyeing pastes are manufactured in existing (e.g., approx. RAL) or customer-specific colours for the coloration of transparent or filled epoxy coatings. A compatibility test should be carried out for applications in already pigmented epoxy systems. A high colour yield and reproducibility of the colours are ensured due to optimum dispersion of the pigments.

**Material base:**

A/F epoxy resin

**Colours:**

Colours / Colour deviations due to printing are possible.

**Properties:**

High opacity; no nuancing is necessary, colours are easy to incorporate as they are already adjusted (list of colours on request).

**Application:**

NEFA® POX dyeing pastes are incorporated homogeneously into Component A with usual methods. Opened containers should be closed carefully and used up quickly.

**Density:**

Approx. 1.4 to 2.5 g/cm<sup>3</sup> depending on the colour

**Dosage:**

Transparent base: 2 – 4 % by weight referred to the mixture  
Filled base: 4 – 8 % by weight referred to the mixture

**Storage:**

Storable for at maximum 18 months in undamaged, closed, original containers in a cool, frost-free place.

**Packaging unit:**

package sizes on request

**Hazard information and safety advice:**

Users are requested to take the relevant data from the safety data sheet

**Technical service and production site:**
